

Comprehensive VPOP Solution

Leveraging the strength of its advanced IDC room facilities, extensive network, professional staff and superior experience, China Telecom has successfully helped many overseas operators set up VPOP points in Hong Kong to facilitate their entry into the Asia-Pacific market.

Strengths:

- High standard Infrastructure
- Redundant Network
- Management Service
- Technical Support
- Remote Customer Service
- 24*7*365 English NOC Support

Optimizing operations and planning ahead

Communication applications

We provide tailored global network circuits (IPLC, IEPL, VPN+), broadband Internet access and numerous other information applications. As well, we provide a Global Chinese Internet content center, more than 300 nationwide backbone nodes, over 6400G backbone bandwidth, direct connection to 15 countries and regions and over 100 ISP.

Network consultation, disaster recovery and call center services

Our professional IT consulting team will be responsible for global network set up, network management and business planning.

Network building integration and outsourcing services

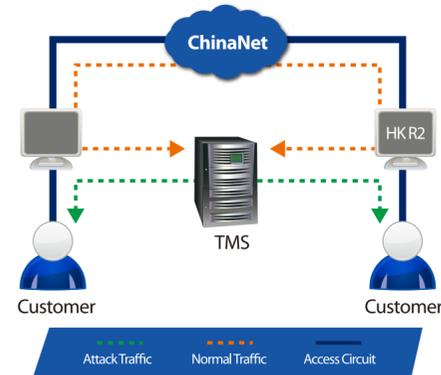

We provide mainland and overseas cross-regional system integrations, communication network solutions, facilities maintenance services, purchase and leasing services, as well as cost-saving plans and solutions.

Network management and expert consultant services

We will provide network performance and optimization reports, emergency response services, as well as ideas on improving network systems and operations.

With our own global network, we provide virtualization and private cloud services

Cooperating with some of the world's leading enterprises, we provide tailored virtualization and cutting-edge cloud computing solutions.

Customized and Secure Services

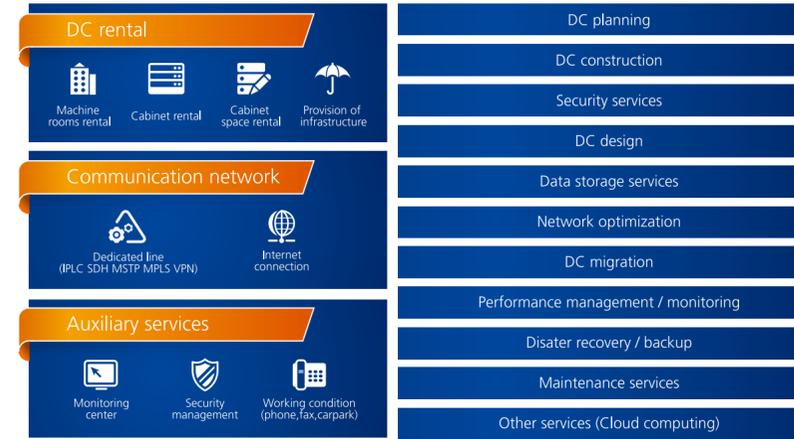

Providing "worry-free" services

Both a creator of China's first IDC and a pioneer of advanced technologies, China Telecom is the industry's standard setter and provides high standard IDC services worldwide.

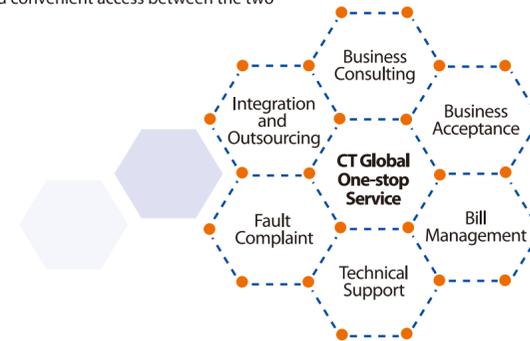

Customized and secure IDC operations

Comprehensive package: China Telecom will take care of all your IDC needs, from facility lease to overall construction, operation and maintenance services.

Technical support by a global team of experts: China Telecom will take care of all your pre-sale and post-sale problems, provide business consultations, technical support and service guarantees. Our broad team of product managers, engineers and global support team will provide reliable, round-the-clock maintenance and service, giving you peace of mind at all times.

China Telecom's worldwide network is directly accessible in 72 countries and covers over 300 countries and regions worldwide, allowing your data to instantly reach the different corners of the world. An 800Gbps transmission bandwidth between mainland China and Hong Kong enables fast and convenient access between the two locations.

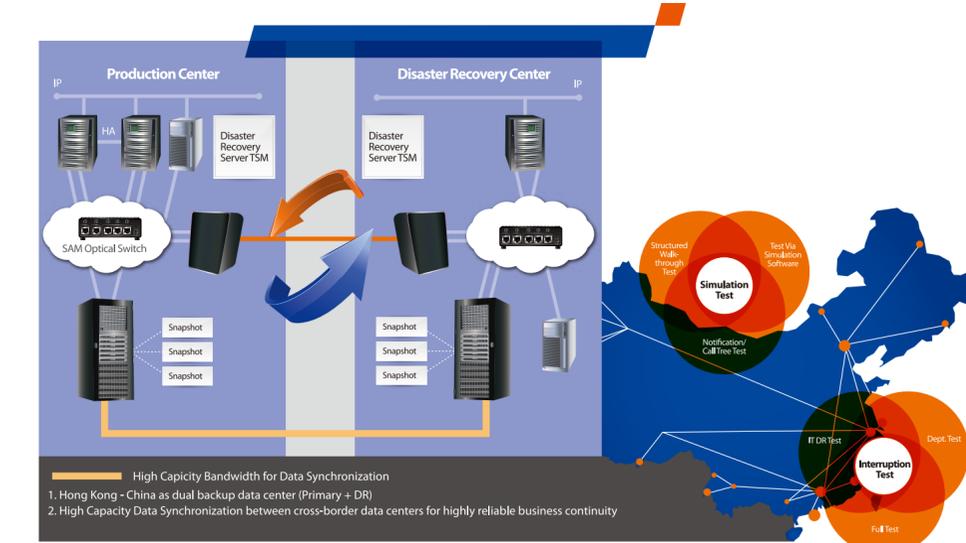

Managing and Minimizing Risks

China Telecom's global disaster recovery service can achieve real-time cross-border dual-way backup. Globally, we offer four levels of disaster recovery and seven levels of service.

China Telecom provides four levels of disaster recovery services globally: 1) regular data backup services, 2) regular data backup and business recovery services, 3) real-time data backup and business recovery services and 4) real-time data backup and fast recovery service.

We provide the most comprehensive and reliable infrastructure and global disaster backup service guarantee. In addition, we provide network communication management, data processing, business inquiry and many other value-added services.
