China Telecom Overview

China Telecom has emerged as the leading IP-VPN provider in Mainland China.

With worldwide transmission network and a high-performance Convergent Network (CN2), China Telecom has emerged as the leading IP-VPN provider in Mainland China. China Telecom provides a superior and scalable global VPN (Virtual Private Network) that covers the entire Mainland China. No matter where your business takes you, China Telecom is ready to provide high quality network and exceptional support. China Telecom provides the most direct, one-stop shop service, making it easier for you to manage multiple sites.

Our vast network resources ensure secure data transmission; in particular, for VoIP Video or ERP application, we provide 5 levels of Quality of Service (QoS) and Service Level Agreement (SLA) to meet all your specific needs and requirements.

Let Us Prove Our Strength and Resources to You

Global CN2 Network
- 19 nodes covered in major overseas cities, including Hong Kong, Tokyo, Singapore, London, Frankfurt, New York, Washington, San Jose, Los Angeles, Miami, Australia and so on. In addition, China Telecom has partnered with several global carriers to further extend our MPLS service around the world.
- CN2 facilitated Dual-PE in 185 cities. China Telecom has also installed Dual-PE in 148 Single-PE cities to secure service availability.
- Service coverage over 312 cities in Mainland China.
